

2018 National Formulary

Effective 01/01/2018

The Formulary List is a guide providing tier designation for common medicines within select therapeutic categories. The Formulary List may not include all drugs covered by your prescription drug benefit. Generic medicines are available within many of the therapeutic categories listed, in addition to categories not listed, and should be considered as the first line of prescribing.

For benefit coverage or restrictions please check your benefit plan document(s). This listing is revised periodically as new drugs and new prescribing information becomes available. It is recommended that you bring this list of medications when you or a covered family member sees a physician or other healthcare provider.

Tier Definitions

- 1 Generics
- 2 Preferred Brands
- 3 Non-Preferred Brands

- (ST) Step Therapy
